PrepGraph THE SCHOOL PROGRAMME

FOR SCHOOLS AND SCHOOL GROUPS IN INDIA

One tutor for every child. One portal for the school. One programme for its teachers.

PrepGraph's voice tutor speaks and draws on a whiteboard in English, and Hinglish (Hindi with English technical terms), keeps a map of what each student knows and sends parents a weekly report by email. Your school — or your group of schools — gives it to every child with a printed badge-and-PIN login card, runs it from the institutions portal and trains its teachers through PrepGraph Academy. The same tutor a parent buys for ₹249 a month, built for the whole school.

FOR EVERY CHILD

A voice tutor that speaks and draws, and a printed login card.

FOR THE SCHOOL

The institutions portal, and a Monday email for every parent.

FOR ITS TEACHERS

A twenty-five-hour programme, and a three-hour session for the leadership team.

> **₹249 a month for a parent. ₹799 per student for a 90-day term. Terms for a whole school or a group of schools are quoted in writing.**

01 — EVERY CHILD

What every child gets

A voice tutor

The student speaks; the tutor teaches by speaking back, drawing on a whiteboard as it goes. English, and Hinglish (Hindi with English technical terms). JEE, NEET and Class 3 to Class 12. In the browser, on any device — and on Google Play since July 2026.

A map of what the child knows

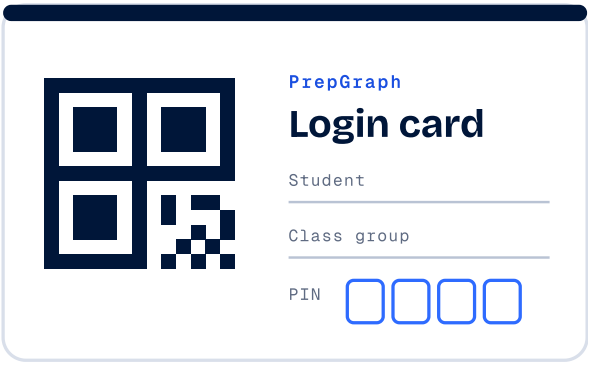

Every session updates a map of the concepts the student has and has not shown. The student sees what to do next. The teacher sees what the class keeps getting wrong on the morning class card, with Reteach in tutor beside each line, and who needs help today, by name — before the class starts.

A weekly email for every parent

Every Monday: the time with the tutor, the topics worked on, the checks answered correctly, what was mastered, what needs more practice, and a note from the teacher when there is one. No app to install and no login for the parent.

For a school, the login is a printed card

Each card carries a badge any phone scans and a short PIN the child types — no email, no password to reset, no account a child has to create. Cards are minted and printed from the portal for a whole class group at once. A child without a card uses the class code and picks their name.

Scan the badge with any phone. Type the PIN.

A whole school in Haryana

A whole school in Haryana runs it this way: the roster loaded into the portal and organised into class groups, a login card minted and printed for every child, teachers with portal logins. Ask about it on the walkthrough.

02 — THE SCHOOL

What the school runs

The institutions portal, in the browser, for one campus or a group.

Organisation, branches and class groups

Roster import and enrolment, campus by campus; login cards minted and printed for a whole class group at once.

Class logs, assignments and homework

Assignments authored and published from the portal, submissions and grading in one place, and homework generated automatically.

The morning class card

What the class keeps getting wrong, with Reteach in tutor beside each line; Who needs help lists the students to see today, by name, before the class starts.

Question generation from a teacher's own file

Upload a PDF; questions are drafted from it, the teacher reviews and approves each one, then attaches them to an assignment.

Faculty, guardians and doubts

Teachers with portal logins; a guardian on record for every child; students' doubts reaching their teachers in one place.

Analytics across branches

The branches view is the one page the chairman opens.

For a group of schools

One agreement covers every campus on the same per-student terms, rolled out campus by campus. Each campus goes live on a roster upload: cards minted from the portal, teacher cohorts scheduled on staff-development days, parents on email from the Monday after launch.

Keep your classroom. Add an AI layer.

YOU KEEP

- Your teachers
- Your board and chapter plan
- Your timetable
- Your campuses
- Your ERP

PREPGRAPH ADDS

- A voice tutor for every child
- A login card for every child
- The morning class card for every teacher
- A Monday email for every parent
- A programme for every teacher

Teachers decide. The tutor carries the practice they set.

What the teachers get

PrepGraph Academy. AI recommends. Teachers decide.

The AI-Enabled Educator programme

Twenty-five hours in ten modules over twelve weeks: understanding AI in education, responsible AI for teachers, the teacher's role in an AI classroom, computational thinking across subjects, AI-enabled pedagogy, assessment and learning gaps, a teacher productivity lab, the PrepGraph teacher workflow, a practicum in the teacher's own class and a capstone the school can read.

Designed around CBSE's Computational Thinking & AI training theme for 2026-27 and its CPD guidelines. The 2026-27 CPD year closes on 31 March 2027; a twelve-week cohort that starts by December finishes inside it.

The seven-step workflow the programme teaches

- Teach
- Assess
- Identify
- Diagnose
- Intervene
- Verify
- Review

Named students get named practice, carried home by the tutor; then they are reassessed on the same competencies.

The leadership session

Three hours with the principal and the leadership team on running an AI-enabled school — before the teacher cohort begins.

The readiness self-assessment

Ten questions across eight areas, a printable report, the three risks to deal with before anything else, and a 90-day plan. No sign-up to see the result.

academy.prepgraph.com/assessment

PrepGraph is a private company. Where this page names a government body, board, agency or scheme, it names a public document so that a reader can check it against the source. No such body has reviewed this page or PrepGraph's products, and nothing here is a statement by, or on behalf of, any of them.

04 — COST, AND THE START

What it costs

₹249
A MONTH

What a parent pays for the same tutor on prepgraph.com — a seven-day trial, cancel anytime.

₹799
PER STUDENT

A seat for a 90-day term: the voice tutor, a printed login card, the portal for the teachers and the Monday email. On the school's purchase order or funded by a parent.

In writing
FOR THE SCHOOL

Terms for a whole school or a group of schools are quoted in writing after the walkthrough.

The leadership session and the teacher programme are quoted in writing with the whole-school terms.

On your purchase order, with a GST invoice carrying our GSTIN.

How it starts

The leadership session, then one class group or one grade for four to six weeks — founder-led, with activation and usage reported to you every week. A whole-school quote follows the review.

01 **Discovery**
Your board, your class groups and your chapter plan; the tutor's scope set to what your teachers are teaching this term.

02 **Class-group setup and roster upload**
The roster loaded into the portal and organised into class groups.

03 **Teacher onboarding**
A walkthrough of the morning class card, class logs, assignments and homework.

04 **Student launch with printed login cards**
Cards minted and printed from the portal; each child scans in with any phone and types a short PIN.

05 **Monitoring and intervention**
Teachers work from the morning class card; parents get the Monday email; you see activation and usage every week.

06 **Review and expansion**
The next grade, the next campus or the whole school on the same terms.

05 — DATA, AND THE NEXT STEP

Where a child's voice and text go

01 Student speech and text go to approved AI endpoints in Azure India and to named speech providers, set in the system, not by each user.

02 Tutoring is a live voice session. The student's learning record is kept; retention terms for your school go in the agreement.

03 A child logs in with a printed card: a badge any phone scans and a short PIN the child types. No email address, no phone number, no password to reset, no account a child has to create.

04 One email every Monday: the time with the tutor, the topics worked on, the checks answered correctly, what was mastered, what needs more practice, and a note from the teacher when there is one. No app to install and no login for the parent.

05 No advertising tag runs in a child's session. Connections are encrypted in transit. Grievance contact under the Digital Personal Data Protection Act, 2023: privacy@prepgraph.com.
